DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the mailing address of each inventor. A mailing address is an address at which an inventor customarily receives his or her mail and may be either a home or business address. The mailing address should include the ZIP Code designation. The mailing address may be provided in an application data sheet or a supplemental oath or declaration. See 37 CFR 1.63(c) and 37 CFR 1.76.

It does not identify the city and either state or foreign country of residence of each inventor. The residence information may be provided on either an application data sheet or supplemental oath or declaration.

Please note that only the residence address for the first inventor has been provided and not the mailing address. There is no residence address and mailing address provided for the other two inventors.

Applicant is now required to submit a substitute declaration or oath to correct the deficiencies set forth in this communication. The substitute oath or declaration must be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability" (PTO-37). Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136. Failure to timely file the substitute declaration (or oath) will result in **ABANDONMENT** of the application. The transmittal letter accompanying the declaration (or oath) should indicate the date of the "Notice of Allowance" (PTOL-85) and the application number in the upper right hand corner.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 19, line 1, delete "system of claim 19" and insert - - system of claim 15 - -.

Allowable Subject Matter

3. Claims 1-6, 8-17, 19-24 are allowed.

The following is an examiner's statement of reasons for allowance: The allowability of the claims resides, at least in part, that the closest prior art of record **Nakashima (US 2003/0125832 A1)** does not disclose or suggest, alone or in combination the step of:

As per independent claim 1, **identifying two events between which the monitor job should occur; identifying a position in a buffer in which to place the monitor job in response to a predefined event occurring, wherein placing the monitor job in the identified position will cause the monitor job to be executed at a correct time; and placing the monitor job in the identified position in the buffer,** in combination with the other elements and features of the claimed invention.

Regarding independent claim 8, **identifying which of the portions are required for processing a job upon receiving a processing request for the job; updating the new job count for each portion that is required; comparing the threshold value for each portion with the summation value; and accepting the job for processing only if the summation value meets the threshold value**, in combination with the other elements and features of the claimed invention.

As for independent claim 15, **instructions for identifying a position in the job buffer in which to place the job in response to the trigger event, wherein placing the job in the identified position will cause the job to be executed at a correct time; and instructions for placing the job in the identified position in the job buffer wherein the manufacturing tool comprises a plurality of processing portions, and wherein each portion is associated with a threshold value, a new job count representing a request that has been received but not yet accepted to process a job using the portion, and a summation value that includes the new job count and a number of jobs designated for processing by that portion**, in combination with the other elements and features of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
